PROFESSIONAL SUMMARY

Detail-oriented AI Automation Specialist and Workflow Architect with proven expertise in designing and implementing intelligent, end-to-end automations using n8n, Zapier, and Make. Passionate about transforming manual processes into efficient, scalable systems that save time, reduce errors, and drive business growth for service-based companies worldwide. Specialized in integrating CRMs, scheduling tools, communication platforms, and AI technologies to deliver practical, reliable solutions. Recognized for clear communication, thorough documentation, and a proactive problem-solving approach. Ready to support international clients across US, EU, and Asia time zones with high-quality automation services.

CORE SKILLS & EXPERTISE

Automation Platforms

- n8n (Advanced) – Self-hosted workflows, custom nodes, real-time triggers, error handling & monitoring
- Zapier (Advanced) – Multi-step Zaps, Paths, AI Actions, Formatter, Code by Zapier
- Make (Intermediate) – Complex scenarios, routers, iterators, data transformation

AI & Intelligent Automation

- Conversational AI (OpenAI, Claude, Gemini)
- Sentiment analysis, dynamic decision-making, and automated responses
- AI-powered content generation and lead qualification

Tools & Integrations

- Asana, Airtable, Notion, ClickUp
- Google Workspace (Gmail, Sheets, Docs)
- Slack, WhatsApp Business, Email Automation
- Webhooks, REST APIs, real-time data syncing

Other Strengths

- Workflow design & process optimization
- System integration & troubleshooting
- Cross-timezone collaboration

MAJOR PROJECTS & PORTFOLIO HIGHLIGHTS

AI-Driven Booking & Appointment Automation System

Personal Project – n8n + Conversational AI

- Designed and deployed a complete real-time booking management system that automates availability checks, appointment scheduling, and two-way calendar syncing.
- Integrated conversational AI to handle customer inquiries, confirm bookings, and deliver instant responses.
- Connected with Gmail for automated confirmations, reminders, and follow-ups.
- **Result:** Eliminated manual scheduling, significantly reduced administrative workload, and improved customer response time.

Automated Lead Management & Sales Outreach Workflow

Built with n8n + AI

- Designed and implemented an end-to-end automated sales pipeline that ingests leads via webhooks and Google Sheets, enriches & scores them using Google Gemini (LLM), then routes them through intelligent conditional logic.

- Automated personalized outreach, nurturing sequences, and re-engagement cadences using Gmail, real-time Slack alerts for hot leads, and dynamic updates in Google Sheets.
- Integrated JavaScript nodes, HTTP requests, and conditional branching to reduce manual effort, accelerate lead response time, and improve pipeline visibility.
- Used Apollo.io for verifying emails, and Hubspot for CRM.

Technologies: n8n, Google Gemini, Google Sheets, Gmail, Slack, JavaScript, Apollo.io, Hubspot

AI-Powered Personal Finance Tracker

Personal Project – n8n + Telegram + Google Gemini

- Built a Telegram-based expense tracker that logs transactions from text messages, receipt photos, and PDF statements.
- Used Google Gemini to read and extract structured transaction data from images and documents automatically.
- Logged entries to Google Sheets for ongoing tracking and sent instant transaction summaries back to the user via Telegram.

Technologies: n8n, Telegram API, Google Gemini, Google Sheets

ASANA CRM Lead Enrichment & Quotation Automation

Built with n8n + Asana

- Designed an Asana-triggered workflow that manages the full lead lifecycle, from quotation delivery to follow-up to escalation.
- Automated Google Drive folder creation and file sharing for each lead, plus quotation sending with attachments.
- Built time-delayed follow-up sequences and automatic escalation emails for unresponsive leads based on task status.

Technologies: n8n, Asana, Google Drive, Gmail

AI Voice Receptionist

Built with n8n + VAPI

- Built a voice AI receptionist that handles appointment booking, rescheduling, and cancellations over live phone calls.
- Synced real-time availability with Google Calendar and logged booking and call data to Airtable.
- Included call recording capture and structured error handling across all booking, update, and cancellation flows.

Technologies: n8n, VAPI, Google Calendar, Airtable

PROFESSIONAL EXPERIENCE

Accounting Staff

Banana Telecommunications, Philippines 2022 – 2023

- Managed full-cycle accounts receivable and accounts payable processes.
- Conducted accurate cash reconciliation and inventory verification.
- Cleared financial backlogs and prepared timely, accurate financial reports.
- Supported overall financial operations with strong attention to detail and data integrity.

EDUCATION

Bachelor of Science in Management Accounting

University of Mindanao

CERTIFICATIONS

- Zapier Certified
- n8n Workflow Professional
- Make Advanced Scenarios
- Prompt Engineering & AI Automation
- Gohighlevel CRM training

WHY WORK WITH ME

- **Results-Focused:** I build clean, well-documented, and maintainable automations that deliver immediate value.
- **Client-Centric:** Strong communicator who provides clear updates, training, and ongoing support.
- **Reliable & Flexible:** Fully remote with excellent availability across US, EU, and Asian time zones.

Open to freelance projects, long-term retainers, and full-time AI Automation roles.
